LOTS FOR DEALERS CONTINUED.

The following lots are well adapted to the wants of dealers who have a large trade in cheap coins. They are from a large invoice, recently imported, and comprise an immense variety of the copper coins current throughout Europe for the last fifty or one hundred years. Good examples will be found amongst them from most countries, and probably from all the German States. They have not been assorted, and duplicates will without doubt, be found in all the lots: the selection is only with reference to condition, which will be found not only to average good, but nearly every piece is fairly good: none are perforated and none are very poor.

PROOF SETS.

The following proof sets are generally in papers as they left the mint; they are all in fine condition, though many of the pieces have more or less tarnish which proof sets are pretty certain to acquire, however carefully they may be kept. This tarnish may be instantly removed without injury to the coins, by dipping them for an instant in a strong solution of cyanide of potassium, then rinsing them thoroughly in a stream of cold running water: they should then be dried in boxwood sawdust. If proper care is used, this process will not harm the finest proof: different metals must never be dipped in the same solution. Cyanide of potassium is amongst the most deadly of poisons, and the solution when used, ought immediately to be thrown away. The stuff is cheap and not worth preserving.

ADDENDA.

UNIQUE AMERICAN COIN.

In 1782 the financier, Robert Morris, reported a system of coinage devised by Gouverneur Morris, the unit of which was an imaginary piece of small value. The largest coin, the Crown, was to be of gold, valued at 10,000 of the units; the next of silver, the Mark or Dollar of 1,000 units; the next the Quint or Half Dollar of silver of 500 units; and the Bil or Bit of silver of 100 units; and a copper coin of 10 units. Of these coins, until the present piece was discovered in Scotland, but three examples were known to exist, one of the Mark, and two of the Quint; the obverses of the last two pieces differ materially, the reverses are from the same die. The gold Crown is unknown, and it is quite likely was never struck, and doubtful if dies were ever prepared for it, as all the dies which were made for a government coinage at the period — 1782–3 — with a single exception, were accounted for before the discovery of this piece.

The Mark, and the two Quints mentioned, were formerly in the collection of Mr. S. S. Crosby, to whose work on American Coins, pages 307 and following, reference is made for a full and interesting account of all that is known concerning these incunabulæ of American coinage, for it is certain that they comprise the earliest efforts looking to the establishment of a Government coinage.

The three pieces referred to are now all in the magnificent collection of Mr. Loring G. Parmelee of Boston.

1 1783 The Bit: device, an eye on a plain field within a glory or sun of thirteen points; within the points a circle of thirteen stars; legend, NOVA CONSTELLATIO: rev., a wreath enclosing the letters U. S. and the figures 100 below; legend, LIBERTAS. JUSTITIA. 1783; size, 11; weight, 27 grs. nearly. The edge of this piece is ornamented with leaf work similar to the larger denominations.

The coin has been carefully compared with the three previously referred to: it is not only of the precise style of workmanship of the others, but the dies are undoubtedly by the same artist. It has existed for an unknown period in the collection of an old numismatist in Scotland, whose recent death led to the dispersion of his cabinet by auction. The condition of the piece is perfect, uncirculated, and as nearly proof as coins of the period are found; it is covered with a dark film, which scarcely obscures its brilliancy: this film may be instantly removed, but is in itself important evidence of the authenticity and antiquity of the coin. It will be limited at $550. If that starting bid is made, it will positively be sold, otherwise it will not be offered. See Plate Cat. 73, 1 ad.

2 1851 Dollar; original, brilliant, almost proof, *excessively rare.*

3 1852 Dollar; original fine impression, splendid surface, with slightest possible hay marks.

4 1847 Half Cent: *original*, splendid proof, *excessively rare.*

Years ago, when the difference was not generally known between originals and mint re-strikes of the rare half cents, and when the distinction, if known, was disregarded, I may have seen or owned an original 1847. I know, positively, that the highest prices ever realized for the 1842 and 1847 were for re-strikes, one of which is in my sale 73, number 656. I am at this moment much in doubt whether I have ever before even seen an original 1847 half cent.

5 1735 Four Daler; plate money of Sweden; a thick copper plate, stamped in the centre "4 Daler Silf. mynt," two arrows crossed below, in each corner a large circular stamp, "F. R. S., 1735," with large open crown above; very fine: size, 9½ x 10 inches. The largest example with, perhaps, one exception, I have ever met with; *very rare.* These pieces are reckoned as money of necessity by Mailliet.

6 1727 Half Daler of the same style as the last; fine; scarce; size, 3½ x 3⅝.

7 1743 Half Daler; plate money; like the preceding; has been used to support the point of a spindle, and thereby slightly damaged.

This Catalogue, No. 73, will be issued after the sale with one heliotype plate, illustrating the Blake Cents. It will be printed on heavy tinted paper, neatly priced in red ink, and sent to order at one dollar per copy; the same on ordinary paper with the plate may be had before the sale for twenty-five cents each. This is issued that buyers may have a fair idea of the appearance of some of the coins before purchasing.

Any of my catalogues, numbering at the present time seventy-three, may be had priced on application; a list of them, to number sixty-four, with price of each, can be had.

Correspondents who intend to favor me with orders for this sale, are earnestly requested to send their orders at the earliest practicable day, as disappointment frequently occurs owing to delay or miscarriage by mail.

Orders may also be sent to the Auctioneers, or to any of the Coin Dealers.
